Chimps of Tanzania

DAY-BY-DAY ITINERARY

Primate viewing safari

80 miles south of where explorers Stanley and Livingstone first met, wild chimpanzees make their home in the Mahale mountain forests near Lake Tanganyika. There are no roads in this park. Humans enter only on foot or travel along the coast by boat.

Welcome to Deeper Africa

Wildlife encounters, at once spontaneous and beyond imagination, result from our in-depth knowledge of seasonal wildlife migrations and patterns. Our guides possess a lifetime of African lore and the skills of a master tracker. *It's being in the perfect place at the perfect time.*

As a worldwide team with vast experience, we provide you with exceptional personal service. We attend to every detail. We help you learn about Africa's important conservation issues. *Arrive in Africa fully prepared and ready to explore.*

We believe that local African communities must benefit and prosper from the conservation and enjoyment of Africa's wildlife. They ensure the future. Your dollars protect wildlife and wild lands, as well as support and nurture local small businesses that in turn support our safari business. *Your dollar makes change.*

Experience wondrous wildlife, enjoy local culture and discover more about the vibrant people and complicated politics unique to Africa. *We love this wild continent.*

Primate viewing with Deeper Africa

Stand within feet of chimpanzees as they accept you

into their community without a sideways glance. Trek with confidence, knowing you'll have success watching these gentle creatures. Hear monkeys and other primates bounce through the trees, rustling leaves, breaking branches and maybe even calling out to family members with their loud hooting.

IT STARTS WITH THESE SOUNDS AND THEN SUDDENLY....YOU ARE AMONG THEM.

Rise early for breakfast and trek alongside your guide into the forests of Mahale. Trackers send word when they have spotted the chimps. These chimpanzees have been habituated for many years by a group of researchers from Kyoto University. Their efforts offer the opportunity to enjoy close encounters with the chimps and to sit quietly and observe their family life as it unfolds around you.

Look for abundant bird life and butterflies, as well as other primates such as the Angola colobus, red colobus, red-tailed monkeys and blue monkeys in the trees.

A close-up photograph of a chimpanzee sitting in a lush, green forest. The chimpanzee is looking towards the left of the frame with a thoughtful expression. Its dark fur is visible, and its hands are resting on the ground. The background is filled with dense foliage and trees, creating a natural and serene environment.

Researchers from
Kyoto University
have observed
Mahale's chimps
since 1960.

Trek chimpanzees on *Day 2*
and then again on *Day 3*.
